

## **XTS CUSTOM PEDALS IMPERIAL OVERDRIVE**

The Imperial Overdrive is a clear, open-voiced, wide-bandwidth overdrive that has been optimized for low gain to higher-mid gain tones. The controls have been designed to provide wide sweet spots that make this pedal easy to dial in. Add just a touch of grit to your tone, or use it to apply a forgiving bit of low-mid squish. Bass response is full and the high end character is clear without being harsh. The Imperial is a great solution for adding the slightest amount of dirt to your clean or sending an already crunchy amp over the edge!

### **GAIN YOU CAN MANAGE**

Gain builds slowly at first, making it easier to dial in low-drive options

### **DYNAMICS CONTROL**

Slight low-mid compression, softer response.

Open and uncompressed, fast, articulate response
